To whom it concerns:

Company Chemetall is one of the leading global players in Surface Treatment technologies. Quality products and services are the prerequisite for our successful business. However, at Chemetall, we know that it takes more than that to be a preferred global supplier.

The chemical treatment of metal surfaces is our core competence. Like no other company, we focus our worldwide activities on the development and implementation of customized technology and system solutions for Surface Treatment. Our products are developed for cleaning, giving corrosion protection, sealing, improving paint adhesion, and facilitating the forming and treatment of metals. Our globally established product ranges, for example Oxsilan®, Gardobond®, Ardrex®, are used in the most diverse industry sectors from automotive to aerospace, and have played a leading role in shaping metal treatment.

By this letter Chemetall confirms that "GrandLine" Company is an active customer of Chemetall, and purchases our Oxsilan system for surface pre-treatment prior painting of production such as metal nets, columns, fences under the trademark GrandLine.

Best Regards,

Thomas Willumeit

Segment Manager General Industry
